Just Comment

In every post we made, we added a comment section. Users will be able to use this comment section to provide comments and feedbacks for the post that we created.

Search bar :

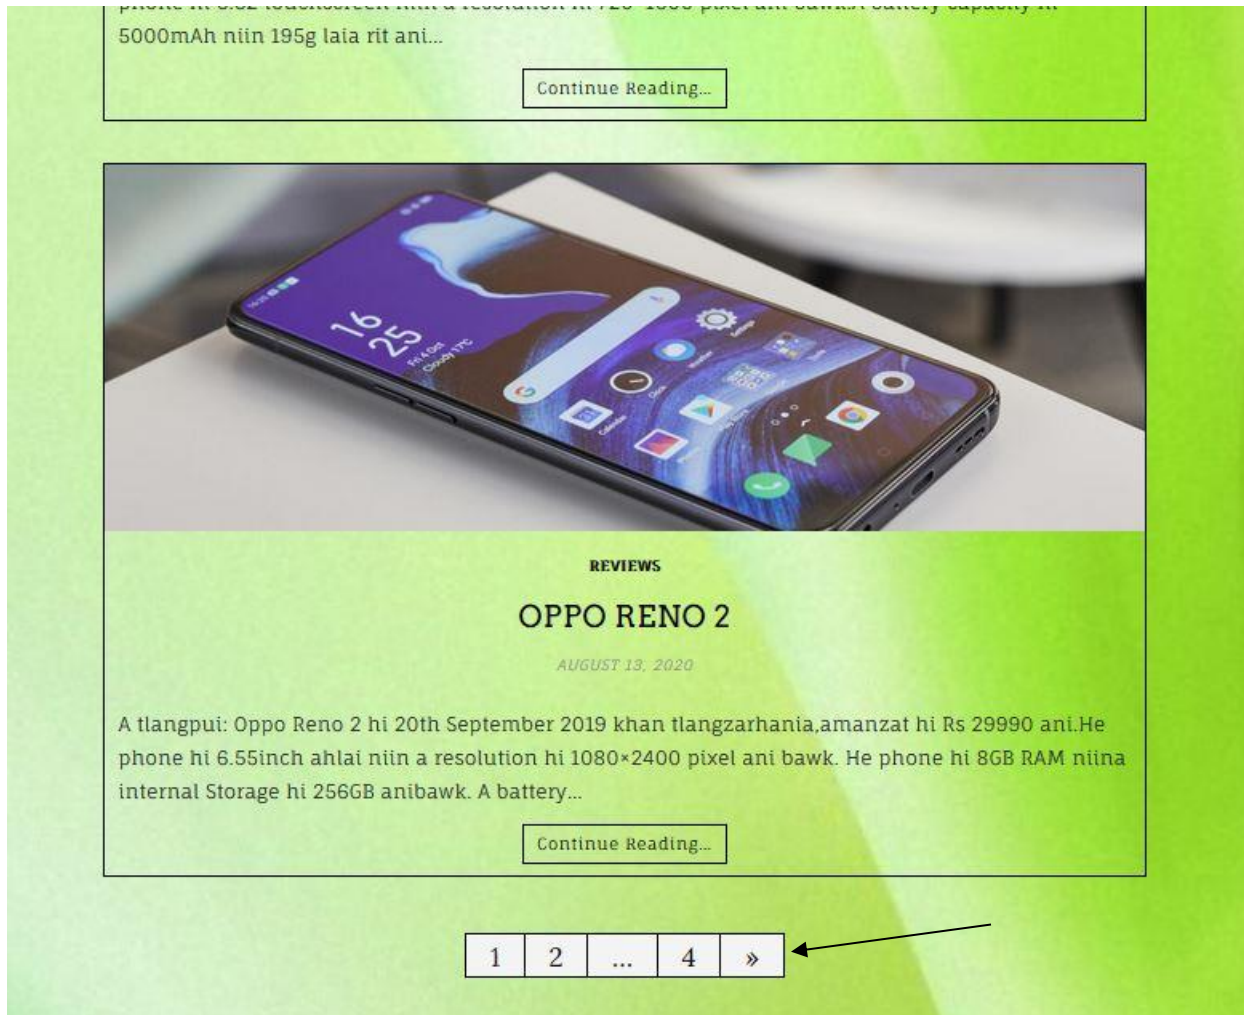

For users accessing the site from desktop or laptops using their web browser, the search bar will be located at the top right of the website, as for mobile users, this search bar will be located at the bottom of the screen. This search bar can be used to search specific post. An example is given below :

In this example, Google Pixel 4A is put in the search button, and only the Google Pixel 4A post is displayed to the user.

Page number :

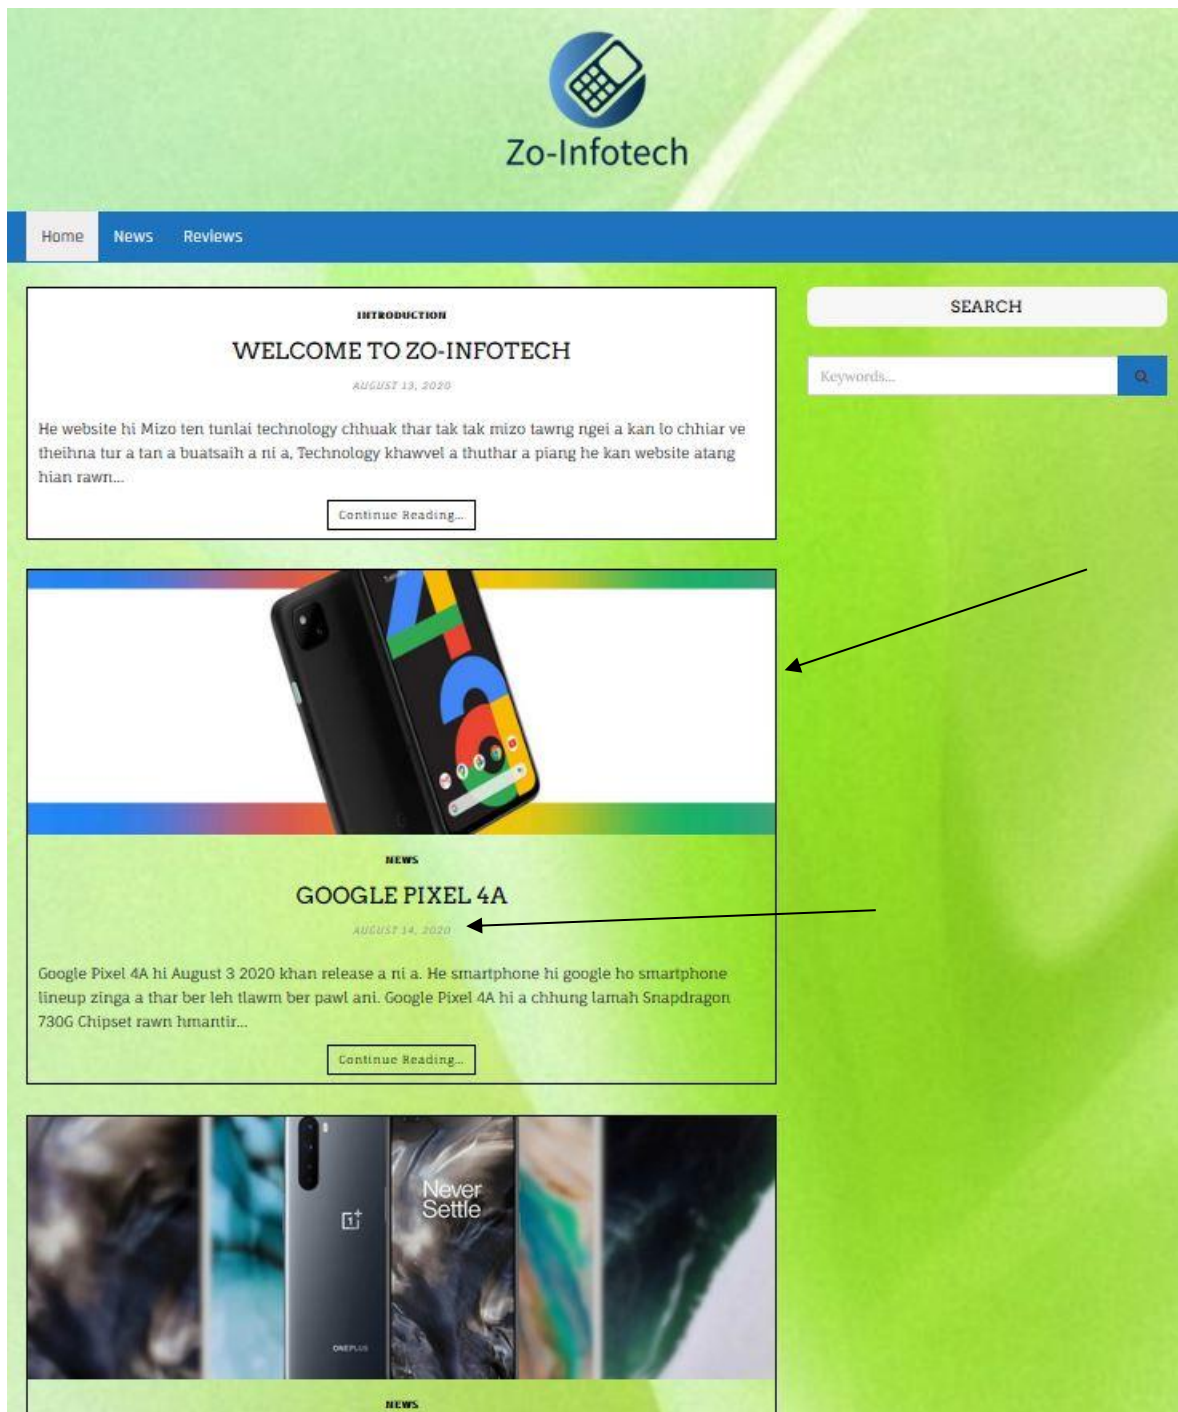

At the bottom of the screen, there will be a page selection button, since we only allow upto 10 post to be displayed to prevent long website user interface, clicking the right arrow or on the numbers will display the other posts.

Contact us :

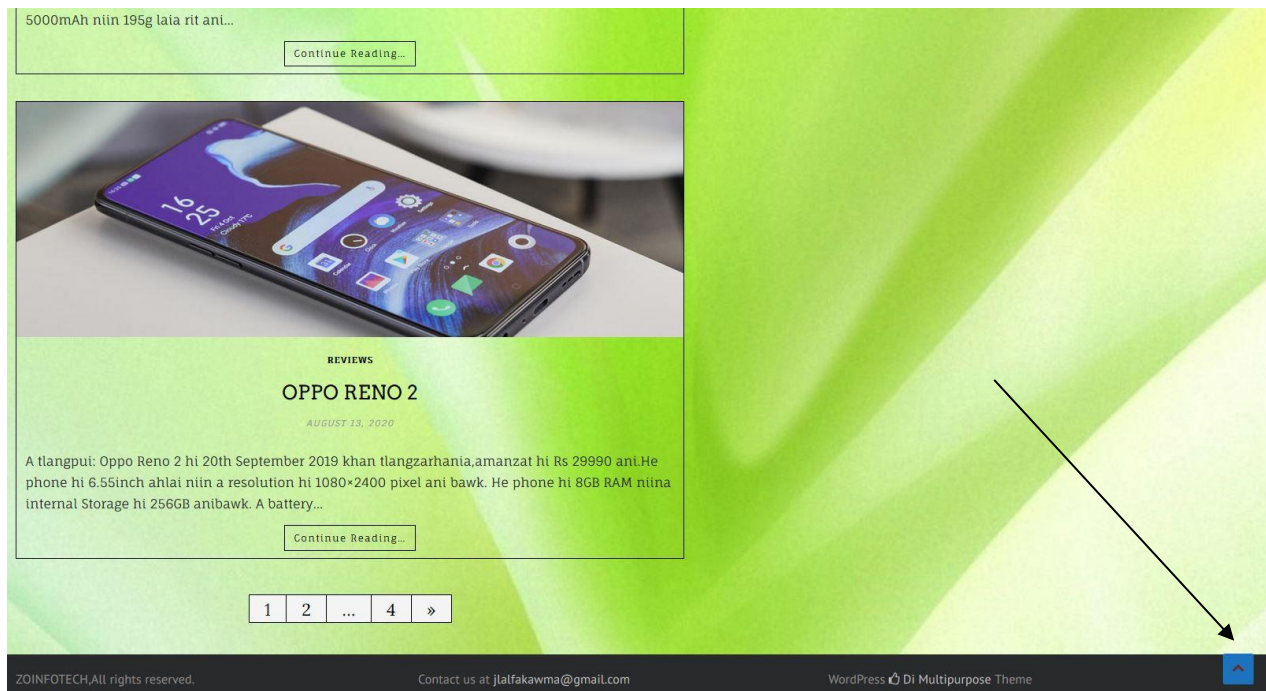

This widget is allocated at the bottom of the screen, users can click the link to send us an email directly.

Latest Posts :

All the latest post that we uploaded will be displayed in the Home section and News section as seen from above, upload date can be seen in each post.

Back to top button :

This button can be used to go back to the top of the page, this widget is implemented since posts tend to become long while viewing the site from smartphones or even browsers. Users can just click this button once and it will scroll back to the top.

Unit Testing :

1. First we login to the admin dashboard panel using the login credentials.
2. To create a post on our website, we head to the POST tab section and select New Post.
3. After creating our post, we click publish which is located at the top right corner of the New Post Dashboard Panel.
4. After clicking the publish button, a View Post button appears at the bottom left corner of the Dashboard.
5. We clicked on the View Post button that appears and check whether if there are any mistakes in our post, if a mistake is found such as wrong spelling etc, we head back to the Admin Dashboard panel and go to the POST > All post section and select the latest post that we want to edit by clicking the edit button and correcting the mistake.
6. After this step, we click on update post button at the top right corner of the Dashboard and the View Post button appears again, we click this button to verify our post and if there are no more mistakes, then we finalize the post. No more actions needed to be taken.

CONCLUSION

First of all this project is for the partial fulfillment of 6th Semester Bachelor of Computer Applications, in accordance for the making of a helpful website for the Mizo.

From the very beginning since we started working on this project , we have received a good guidance from Mr.Laldingliana Sailo and Mr.Lalrinawma. We want to thank them specially for their effort and support in our project.

And in all the semester we have gone through, we learn a lots of programming which help us in having a good idea on making of this website. Very special thanks to all our professors for the guidance throughout the year's

Last but not least, the main success of this project is all in hands of God. We thanks to our almighty God for helping us and giving us a health to work in our project till it is completed.
